

To the Sarasota Herald Tribune

A member of the New College Fine Arts Institute faculty, Larry Rivers, has been included in an article in the Time Magazine December 17 art section.

Rivers is one of five artists described in the article, which is concerned with a contemporary art form.

The magazine devotes two pages to a color reproduction of Rivers' History of the Russian Revolution, a 33 foot by 14 foot display using a variety of materials to give a total impression.

The son of Russian immigrants, Rivers is quoted as saying that the work is "more a statement of art than about revolution."

The History goes on exhibition next month at the Jewish Museum in New York City.

Shortly after his exhibition opens, Rivers will come ~~to~~ to the New College Fine Arts Institute to serve on the faculty. His teaching will be from January 31 to February 10.
